

## HELIX

Inspired by the relationship between natural science and mathematics, HELIX is an organic modular system in its purest form. It mimics the exact molecular structure of gold, nickel and platinum, creating endless possibilities and customization. The HELIX embodies the natural energy it is derived from, and can be shortened or lengthened to accommodate any table size.

Intended as light sculpture rather than primary lighting, the effect of the fixture is ambient. Depending on conditions and/or design intent, supplementary lighting may be necessary.
